NaPiRE 2024: Human Factors

Project ID	995994
Survey URL	https://ww2.unipark.de/uc/NaPiRE-HumanFactors/
Date	2025-05-05 12:29:58
Number of variables in survey table	232 (number might change due to compilation)

List: NFRClasses

List type:	dynamic
List ID:	1
Used in questions:	How do you document each type of non-functional requirements selected in the previous question?
Used in loops:	-

List element no.	Meta information	Assign to list, if	Wildcards
1	Source variable (of the selected source project): v_97 (Compatibility (e.g., co-existence, interoperability))	if selected always list element	[1] Compatibility (e.g., co-existence, interoperability)
2	Source variable (of the selected source project): v_98 (Maintainability (e.g., analysability, modularity, modifiability, reusability, testability))	if selected always list element	[1] Maintainability (e.g., analysability, modularity, modifiability, reusability, testability)
3	Source variable (of the selected source project): v_99 (Performance efficiency (e.g., time behaviour, resource utilisation, capacity))	if selected always list element	[1] Performance efficiency (e.g., time behaviour, resource utilisation, capacity)
4	Source variable (of the selected source project): v_100 (Portability (e.g., adaptability, install ability, replaceability))	if selected always list element	[1] Portability (e.g., adaptability, install ability, replaceability)
5	Source variable (of the selected source project): v_101 (Reliability (e.g., availability, fault tolerance, maturity, recoverability))	if selected always list element	[1] Reliability (e.g., availability, fault tolerance, maturity, recoverability)

6	Source variable (of the selected source project): v_102 (Safety (e.g. freedom of risk for health or disaster))	if selected always list element	[1] Safety (e.g. freedom of risk for health or disaster)
7	Source variable (of the selected source project): v_303 (Security (e.g., accountability, authenticity, confidentiality, integrity, non-repudiation))	if selected always list element	[1] Security (e.g., accountability, authenticity, confidentiality, integrity, non-repudiation)
8	Source variable (of the selected source project): v_103 (Usability (e.g., accessibility, appropriateness recognizability, learnability, operability, user error protection, user interface aesthetics))	if selected always list element	[1] Usability (e.g., accessibility, appropriateness recognizability, learnability, operability, user error protection, user interface aesthetics)
9	Source variable (of the selected source project): v_104 (Other (please specify))	if selected always list element	[1] #v_105#
10	Source variable (of the selected source project): v_422 (External or internal constraints (e.g. laws))	if selected always list element	[1] External or internal constraints (e.g. laws)

List: ProblemSelectionStatic

List type:	dynamic
List ID:	2
Used in questions:	-
Used in loops:	-

List element no.	Meta information	Assign to list, if	Wildcards
1	Source variable (of the selected source project): v_385 (Communication flaws within our project team.)	if selected always list element	[1] Communication flaws within our project team.
2	Source variable (of the selected source project): v_386 (Communication flaws between the project and the customer.)	if selected always list element	[1] Communication flaws between the project and the customer.
3	Source variable (of the selected source project): v_418 (Lack of communication between the project team and end users.)	if selected always list element	[1] Lack of communication between the project team and end users.
4	Source variable (of the selected source project): v_409 (Communication channels used in our project are ineffective.)	if selected always list element	[1] Communication channels used in our project are ineffective.
5	Source variable (of the selected source project): v_410 (Changes in requirements are not communicated.)	if selected always list element	[1] Changes in requirements are not communicated.
6	Source variable (of the selected source project): v_388 (Incomplete or hidden requirements)	if selected always list element	[1] Incomplete or hidden requirements
7	Source variable (of the selected source project): v_389 (Insufficient support by our project lead.)	if selected always list element	[1] Insufficient support by our project lead.
8	Source variable (of the selected source project): v_392 (Inconsistent requirements)	if selected always list element	[1] Inconsistent requirements
9	Source variable (of the selected source project): v_393 (Requirements are not traceable.)	if selected always list element	[1] Requirements are not traceable.
10	Source variable (of the selected source project): v_394 (Targets are moving (changing goals, business processes and / or requirements).)	if selected always list element	[1] Targets are moving (changing goals, business processes and / or requirements).
11	Source variable (of the selected source project): v_395 (Gold plating (implementation of features without corresponding requirements))	if selected always list element	[1] Gold plating (implementation of features without corresponding requirements)
12	Source variable (of the selected source project): v_396 (Weak access to customer needs and / or (internal) business information)	if selected always list element	[1] Weak access to customer needs and / or (internal) business information
13	Source variable (of the selected source project): v_397 (Weak knowledge about customer's application domain)	if selected always list element	[1] Weak knowledge about customer's application domain
14	Source variable (of the selected source project): v_399 (We do not have enough time to carry out tasks.)	if selected always list element	[1] We do not have enough time to carry out tasks.

15	Source variable (of the selected source project): v_401 (Technically unfeasible requirements)	if selected always list element	[1] Technically unfeasible requirements
16	Source variable (of the selected source project): v_402 (Underspecified requirements that are too abstract and allow for various interpretations)	if selected always list element	[1] Underspecified requirements that are too abstract and allow for various interpretations
17	Source variable (of the selected source project): v_403 (Unclear or unmeasurable non-functional requirements)	if selected always list element	[1] Unclear or unmeasurable non-functional requirements
18	Source variable (of the selected source project): v_404 (Lack of trust between our project team members.)	if selected always list element	[1] Lack of trust between our project team members.
19	Source variable (of the selected source project): v_411 (Lack of trust between our project team members and stakeholder or customer.)	if selected always list element	[1] Lack of trust between our project team members and stakeholder or customer.
20	Source variable (of the selected source project): v_405 (An important stakeholder is not represented in our project.)	if selected always list element	[1] An important stakeholder is not represented in our project.
21	Source variable (of the selected source project): v_408 (Our team's responsibilities are unclear.)	if selected always list element	[1] Our team's responsibilities are unclear.
22	Source variable (of the selected source project): v_407 (Problems with terminology.)	if selected always list element	[1] Problems with terminology.
23	Source variable (of the selected source project): v_406 (Language barriers)	if selected always list element	[1] Language barriers
24	Source variable (of the selected source project): v_387 (Lack of commitment to shared project goals.)	if selected always list element	[1] Lack of commitment to shared project goals.
25	Source variable (of the selected source project): v_417 (No standard format for documenting requirements.)	if selected always list element	[1] No standard format for documenting requirements.
26	Source variable (of the selected source project): v_459 (Our requirements engineers lack enthusiasm or commitment to do requirements analysis.)	if selected always list element	[1] Our requirements engineers lack enthusiasm or commitment to do requirements analysis.
27	Source variable (of the selected source project): v_571 (Internal or external constraints are not considered.)	if selected always list element	[1] Internal or external constraints are not considered.
28	Source variable (of the selected source project): v_661 (Top 1 problem (most critical one))	(v_661 = '0')	[1] Top 1 problem (most critical one)
29	Source variable (of the selected source project): v_662 (Top 2 problem)	(v_662 > '0')	[1] Top 2 problem
30	Source variable (of the selected source project): v_663 (Top 3 problem)	(v_663 > '0')	[1] Top 3 problem
31	Source variable (of the selected source project): v_664 (Top 4 problem)	(v_664 > '0')	[1] Top 4 problem
32	Source variable (of the selected source project): v_665 (Top 5 problem)	(v_665 > '0')	[1] Top 5 problem

		21	Our team's responsibilities are unclear
		22	Problems with terminology
		23	Language barriers
		24	Lack of commitment to shared goals within project
		25	No use of standard format for documenting requirements

26

Our requirements engineers lack enthusiasm or commitment to do requirements analysis

27

Internal or external constraints are not considered

14 Page: Problems Causes Effects (PGID 6650615)

For each of the critical problems you selected in the previous question, describe what you believe caused the problem. (q_4388846 - Type 143) ⓘ

Variable name v_277	External variable name v_277	varchar	#v_661#
Variable name v_278	External variable name v_278	varchar	#v_662#
Variable name v_279	External variable name v_279	varchar	#v_663#
Variable name v_280	External variable name v_280	varchar	#v_664#
Variable name v_281	External variable name v_281	varchar	#v_665#

For each of the critical problems you selected in the previous question, describe what you believe are the implications of the problem. (q_4388903 - Type 143) ⓘ

Variable name v_282	External variable name v_282	varchar	#v_661#
Variable name v_283	External variable name v_283	varchar	#v_662#
Variable name v_284	External variable name v_284	varchar	#v_663#
Variable name v_285	External variable name v_285	varchar	#v_664#
Variable name v_286	External variable name v_286	varchar	#v_665#

Are there problems caused by humans other than the ones you listed in the previous questions? If so, describe them here. (q_4386921 - Type 142) ⓘ
